WANTED: INDIVIDUAL TAGGED SEA TROUT

A new project is about to be launched in the Isle of Lewis aimed at monitoring sea trout

Why and Where?

Sea trout will be tagged at locations around the **Broadbay area**.

- ✓ Investigate numbers and age structure of sea trout population
- ✓ Investigate sea trout movement around the bay and further afield
- ✓ Determine growth rates and feeding opportunities
- ✓ Record sea lice burdens

Recognition?

- ✓ Adipose fin clipped
- ✓ Tag (orange, yellow or green plastic implant) located above left eye

Your Help?

If you catch a tagged fish please record:

- ✓ **Colour and coding** of the tag
- ✓ Location & date/time of capture
- ✓ Length/weight if possible but not essential

Then please contact your local fisheries trust biologist:
