

## Outer Hebrides Fisheries Trust Glen River Restoration Project.

Outer Hebrides Fisheries Trust would like to announce its intention – subject to funding – to complete a project to clean up pollution and restore the natural habitat of the Glen River.

Pictured below are some examples of pollution that the river has been subject to over the years, and some of the issues facing the river before we can restore it.

Pictured below: A more visually appealing river scene.

The project will commence in  
2017 and is in Partnership with SEPA and Stornoway Trust.
